SUBJECT: Abortive Report.

TO : Commanding Officer, AAF Station 128, APO 557.
ATTN: Air Statistical Officer.

1. The following aircraft aborted from the mission of 25 June, 1944, due to the reasons stated:

a. Aircraft #44-6146 returned early because of loss of pressure in Navigators oxygen system. Ground check revealed materiel failure of oxygen pressure gage. (Mechanical)

b. Aircraft #42-37511 returned early because indicated fuel pressure on #2 engine dropped to zero, immediately after the ship was hit by flak. The pilot feathered the prop and was unable to stay with the formation on three engines. Upon return a ground check showed that the line from the fuel pressure transmitter to indicator had been cut by flak, causing a drop in indicated fuel pressure, while the fuel pressure actually remained constant.
